

Obtaining API Keys

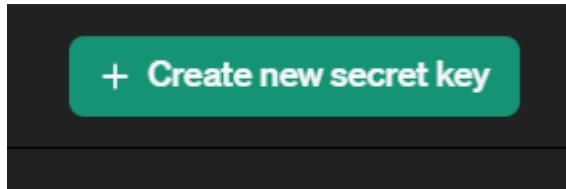

Gryplan

- 1 OpenAI
- 2 Spotify
- 3 ElevenLabs

Obtaining OpenAI API Key

1. Log in to the website <https://platform.openai.com/>
2. Go to the page <https://platform.openai.com/settings/organization/api-keys>
3. Click the button in the upper right corner:

Obtaining OpenAI API Key

4. Enter the key name and select the project (default is Default project):

Create new secret key

Owned by

You Service account

This API key is tied to your user and can make requests against the selected project. If you are removed from the organization or project, this key will be disabled.

Name Optional

Project

Default project

Permissions

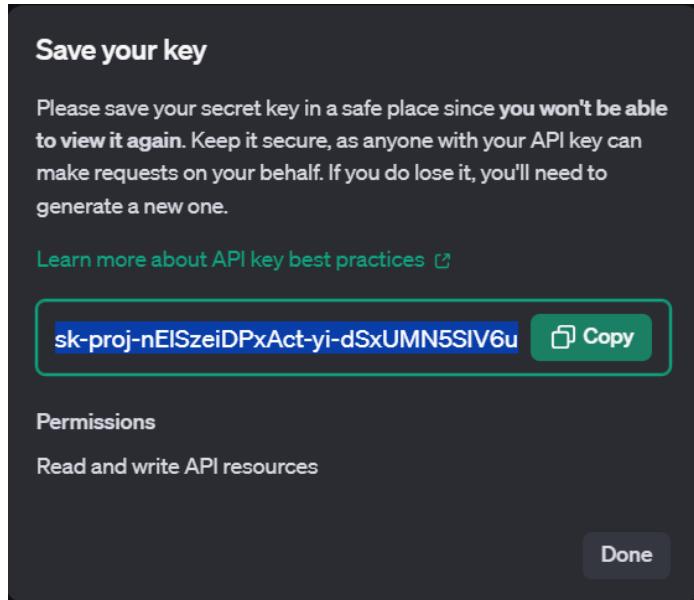

All Restricted Read only

Cancel Create secret key

Obtaining OpenAI API Key

5. Copy the generated API key and paste it in the application's code in the file api_keys.py

A screenshot of a code editor showing a Python file named "api_keys.py". The code contains the following placeholder API keys:

```
1 # Klucz API OpenAI
2 OPENAI_API_KEY = "Here_paste_OpenAI_Key"
3 # Klucz API Spotify
4 SPOTIFY_CLIENT_ID = "Here_paste_Spotify_Client_ID"
5 SPOTIFY_CLIENT_SECRET = "Here_paste_Spotify_Client_Secret"
```

The first line is numbered "1". Lines 2, 4, and 5 each begin with a yellow placeholder icon.

Obtaining ELeven Labs API Key

1. Log in to the website <https://elevenlabs.io/>
2. Go to the page <https://elevenlabs.io/app/settings/api-keys>
3. Click the button:

Obtaining ELeven Labs API Key

4. Enter the key name and click the Create button:

Create API Key X

Please give your new API key a name for identification purposes.

5. Copy the generated API key by clicking the Copy to Clipboard button and paste it in the application's code in the file api_keys.py

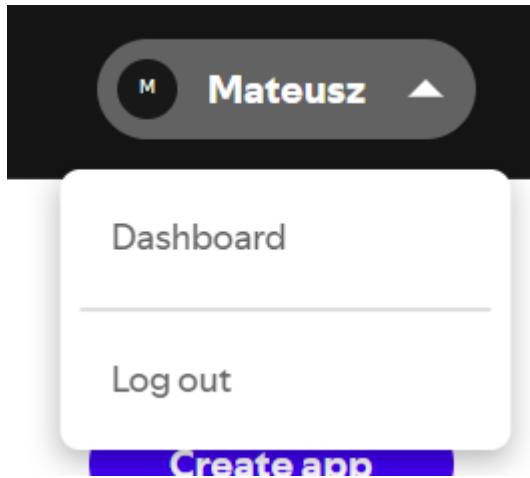

A screenshot of a code editor window titled "api_keys.py". The code is as follows:

```
1 # Klucz API OpenAI
2 OPENAI_API_KEY = "Here_paste_OpenAI_Key"
3 # Klucz API Spotify
4 SPOTIFY_CLIENT_ID = "Here_paste_Spotify_Client_ID"
5 SPOTIFY_CLIENT_SECRET = "Here_paste_Spotify_Client_Secret"
```

Obtaining Spotify API Keys

1. Log in to the website <https://developer.spotify.com/>
2. In the upper right corner, click the Dashboard tab:

Obtaining Spotify API Keys

3. Then click the Create app button:

Create app

Obtaining Spotify API Keys

4. Enter the application name, description, and redirect URI (enter <https://127.0.0.1>) Also, check the checkbox for WebAPI and consent for Spotify data processing

Create app

App name *

App description *

Website

Redirect URIs *

https://127.0.0.1 Add

URIs where users can be redirected after authentication success or failure

Which API/SDKs are you planning to use?

Obtaining Spotify API Keys

5. After creating the app, go to the Settings tab in the upper right corner

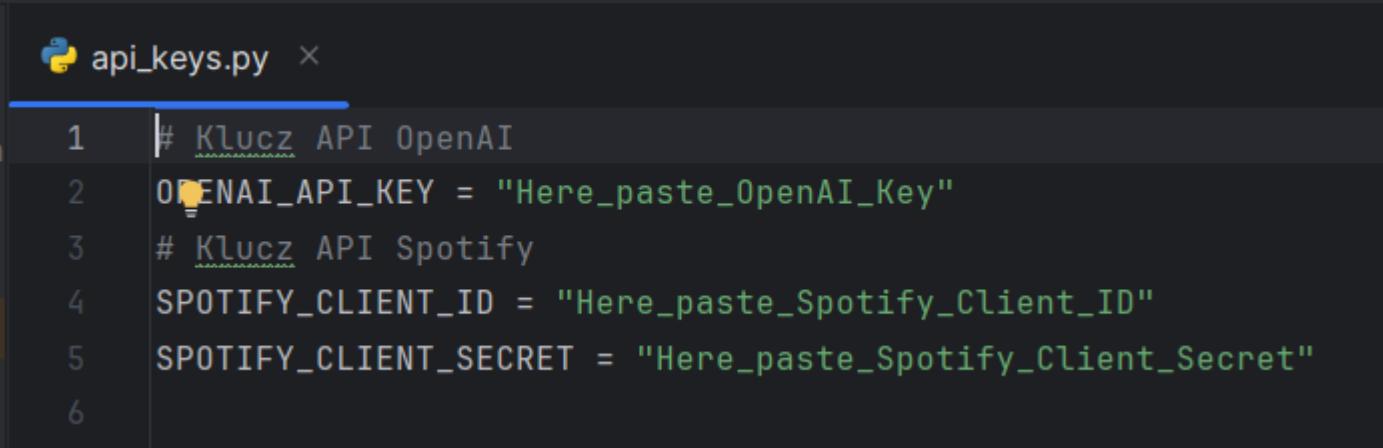

6. Copy the client_id and after clicking the View client link, also copy the client_secret

A screenshot of a web page showing Spotify developer settings. A purple box highlights the "Client ID" field, which contains the value "ee4eec692fa74991a59fbf674edaae3f". To the right of this field is a copy icon (a clipboard with a pencil). Below the Client ID field is a link labeled "View client secret".

Obtaining Spotify API Keys

7. Paste the URI, client_id, and client_secret in the application's code in the file api_keys.py

A screenshot of a code editor showing a Python file named 'api_keys.py'. The code contains six lines of configuration variables:

```
1 # Klucz API OpenAI
2 OPENAI_API_KEY = "Here_paste_OpenAI_Key"
3 # Klucz API Spotify
4 SPOTIFY_CLIENT_ID = "Here_paste_Spotify_Client_ID"
5 SPOTIFY_CLIENT_SECRET = "Here_paste_Spotify_Client_Secret"
6
```
